FINMA is not considered a competent supervisory authority under EU Regulation 1286/2014 on Key Information Documents for Packaged Retail and Insurance-based Investment Products (PRIIPs). | Date of production of the KID: 23.11.2024

The investor is about to purchase a product that is not simple and may be difficult to understand.

1. What is this product?

Type

This product is a Swiss Uncertificated Security under Swiss law.

Term

The product has no fixed lifetime and will be redeemed after the investor has exercised or the Issuer has terminated the product.

Objectives

Objective of the product is to provide the investor with a specified entitlement according to predefined conditions. This product allows the investor to participate in price movements of the Underlying. The product has no fixed lifetime and will be redeemed after the investor has exercised or the Issuer has terminated the product.

On the Redemption Date, the Investor will receive a Cash Settlement (the “Redemption Amount”) in the Settlement Currency. The Cash Settlement is calculated by multiplying (i) the Final Fixing Level with (ii) the Conversion Ratio and (iii) the FX Rate and deducting the Administration Fee (pro rata temporis). The Administration Fee reduces the redemption amount subject to the holding period and has a negative effect on the secondary market price.

Each investor has an annual right to exercise the products for redemption (the “Investor’s Redemption”) by announcement (the “Redemption Notice”).

The Issuer may call all products for redemption with immediate effect by five Business Days prior announcement of the exercise of its termination right (the “Redemption Announcement”) and specification of the Redemption Date (the “Issuer’s Redemption”).

The investor might incur a loss in case the sum of the Cash Settlement on the Redemption Date is below the purchase price of the product. Different from a direct investment in the Underlying, the investor will not profit from any entitlement resulting from the Underlying.

Currency of the product (Settlement Currency)	Swiss Francs (“CHF”)	Minimum Investment / Minimum Trading Lot	1 Certificate(s)
Issue Date	01/11/2019	Initial Fixing Date	21/10/2019
Conversion Ratio	will be determined on the Final Fixing Date in accordance with the terms and conditions of the product	Last Trading Day/Time	Open-end
First Exchange Trading Date	01/11/2019	Redemption Date	Means the 5th Business Day following the Final Fixing Date (subject to Settlement Disruption Event provisions)
Final Fixing Date	In the case of 1) an Issuer’s Redemption as specified in the Redemption Announcement or 2) in case of an Investor Redemption, the day, on which the duly completed and signed Redemption Notice is delivered to the paying agent	Issue Price	CHF 28.87
Initial Fixing Level	An observed price or combination of observed prices (volume-weighted) quoted on the Reference Source(s) on the Initial Fixing Date, adjusted by any fees or costs, in particular trading commissions, levied on the Issuer (or a hedging party thereof) for establishing a hedge position in the Underlying.	Final Fixing Level	An observed price or combination of observed prices (volume-weighted) quoted on the Reference Source(s) for the Underlying on Final Fixing Date, adjusted by any fees or costs, in particular trading commissions, levied on the Issuer (or a hedging party thereof) and profits and losses resulting from the termination of a hedge position in the Underlying (including, but not limited to, any loss realized by the Issuer resulting from fraud, theft and cyber-attacks relating to service provider(s) and/or Reference Source(s) of the Issuer and directly affecting the Underlying).
Settlement Type	Cash Settlement	Exchange Listing	SIX Swiss Exchange AG; traded on SIX Swiss Exchange - Structured Products
Currency Risk	If the Underlying is calculated in a currency different from the Currency of the Product, the conversion into the Currency of the Product will be carried out at the relevant exchange rate.	Administration Fee	1.50% p.a. (deducted pro rata temporis) The Administration Fee reduces the redemption amount subject to the holding period and has a negative effect on the secondary market prices.
Underlying	Ripple	Bloomberg Ticker	XRPUSD
Initial Fixing Level	USD 0.29313	Underlying Type	Crypto Currency
Reference Source(s)	Bitstamp Limited	FX Rate	Prevailing foreign exchange rate on the Final Fixing Date used for exchanging USD into the Settlement Currency.

The product terms provide that if certain exceptional events occur (1) adjustments may be made to the product and/or (2) the Issuer of the product may terminate the product early. These events are specified in the product terms and principally relate to the Underlying(s), the product and the Issuer of the product. For instance, these exceptional events are including but not exclusively limited to the cessation of an Underlying, tax events and the discontinuation of the Issuer’s ability to carry out the necessary hedging transactions. In the event of termination, the redemption amount may possibly be significantly below the purchase price. Even a total loss of the

investment is possible. The investor also bears the risk that the product will be terminated at an unfavorable point in time and the investor might only be able to reinvest the redemption amount on less favorable terms.

Intended retail investor

- The product is aimed at retail investors who intend to form private assets and have a long-term investment horizon.
- The investor can bear losses up to the total loss of the investment amount and attaches no importance to products with capital protection.
- **KNOWLEDGE & EXPERIENCE:** Investors who have at least a basic knowledge of the financial instruments in question (a basic investor can take investment decisions based on regulatory documents or basic information provided by the distributor). No experience of financial markets is required.

2. What are the risks and what could the investor get in return?

Risk Indicator

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because the Issuer is not able to pay the investor.

We have classified this product as 7 out of 7, which is the highest risk class.

This rates the potential losses from future performance at a very high level, and poor market conditions are unlikely to impact the capacity of the Issuer to pay the investor of the product.

The investor shall be aware of the currency risk. If the investor receives payments in a different currency, the final return that the investor gets will depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so the investor could lose some or all of its investment.

If the Issuer is not able to redeem the investor what is owed, the investor could lose the entire investment.

For detailed information about all risks please refer to the risk sections of the legal documentation as specified in the section 'Other relevant information' below.

Performance Scenarios

What the investor will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period: Example Investment: Scenarios		5 years	
		CHF 10'000	
		If the investor exits after 1 year	If the investor exits after 5 years (Recommended Holding Period)
Minimum	There is no minimum guaranteed return. The investor could lose some or all of the investor's investment.		
Stress	What the investor might get back after costs	CHF 0	CHF 0
	Average return each year	-100.00%	-100.00%
Unfavourable	What the investor might get back after costs	CHF 810	CHF 0
	Average return each year	-91.84%	-100.00%
Moderate	What the investor might get back after costs	CHF 5640	CHF 670
	Average return each year	-43.54%	-41.69%
Favourable	What the investor might get back after costs	CHF 23710	CHF 13830
	Average return each year	136.51%	6.69%

The figures shown include all the costs of the product itself, but may not include all the costs that the investor pays to the advisor or distributor. The figures do not take into account the investor's personal tax situation, which may also affect how much the investor gets back.

The stress scenario shows what the investor might get back in extreme market circumstances.

The scenarios shown represent possible outcomes calculated based on simulations.

3. What happens if the Issuer is unable to pay out?

The investor is exposed to the risk that the Issuer might be unable to fulfil its obligations in respect of the product e.g. in the event of insolvency (inability to pay / over-indebtedness) or administrative order. A total loss of the investor's capital invested is possible. The product is a debt instrument and as such is not covered by any deposit protection scheme.

4. What are the costs?

The person advising the investor on the product or selling this product to the investor may charge the investor other costs. If so, this person will provide the investor with information about these costs and how they affect the investor's investment.

Cost over time

The tables show the amounts that are taken from the investor's investment to cover different types of costs. These amounts depend on how much the investor invests, how long the investor holds the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year the investor would get back the amount that the investor invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10'000 is invested

	If the investor exits after 1 year	If the investor exits after 5 years (Recommended Holding Period)
Total costs	CHF 249	CHF 196
Annual cost impact (*)	2.5%	2.4% each year

(*) This illustrates how costs reduce the return of the investor each year over the holding period. For example it shows that if the investor exits at the recommended holding period the average return of the investor per year is projected to be -39.3% before costs and -41.7% after costs.

We may share part of the costs with the person selling the investor the product to cover the services it provides to the investor. It will inform the investor of the amount.

Composition of Costs

One-off costs upon entry or exit		If the investor exits after 1 year
Entry costs	0.5% of the amount the investor pays in when entering this investment. These costs are already included in the price the investor pays.	Up to CHF 50
Exit costs	Exit costs are estimated to be 0.5% of the investment before it is paid out to the investor. These costs are already included in the price the investor receives and are only incurred if the investor exits before maturity. If the investor holds the product until maturity, no exit costs will be incurred.	CHF 50
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1.5% of the value of the investment per year. This is an estimate based on actual costs. These costs are explained in section 1. "What is the product?" above.	CHF 150
Transaction costs	Not Applicable	

5. How long should the investor hold it and can the investor take money out early?**Recommended holding period: 5 years**

The average investor holds this kind of product for about 5 years on average. Furthermore, this period enhances the comparability with other investment products without a fixed lifetime. The investor has the possibility to call the products for redemption according to the "Investor's Termination provisions as described under "1. What is this product?" above. Further, the product might be sold through the exchange where the product is listed or off-exchange.

Under normal market conditions, the price at which the investor may sell the product will depend on the market parameters prevailing at the time, which could put the invested amount at risk.

In unusual market situations, or in the event of technical faults/disruptions, a purchase and/or sale of the product can be temporarily hindered, or may not be possible at all.

6. How can the investor complain?

Any complaint regarding the person advising on, or selling, the product on the relevant website can be submitted directly to that person.

Any complaint regarding the product or the conduct of the Issuer of this product can be submitted to the following address: Leonteq Securities AG, Europaallee 39, 8004 Zurich, Switzerland, kid@leonteq.com, www.leonteq.com.

7. Other relevant information

Any additional documentation in relation to the product and in particular the final terms or the pricing supplement and the issuance and offering programme (including any supplements hereto) are published on the website: www.leonteq.com. In order to obtain more detailed information – and in particular details of the structure of and risks associated with an investment in the product – the investor should read these documents.

Furthermore, Leonteq Securities AG created the KID after having made certain assumptions and exercised certain discretion with respect to calculations of key figures and performance scenarios and is going to reassess and adapt its assumptions as it deems appropriate from time to time.

The Product is not classified as sustainable. No representation as to the sustainability – within the meaning of Regulation (EU) 2020/852 (Taxonomy Regulation) and Regulation (EU) 2019/2088 (Sustainable Finance Disclosure Regulation) or any other sustainability-related law or regulation – of the Product or any Underlying is provided. Any reference to sustainability-related terms in relation to the Product or any Underlying shall not imply the provision of any such representation by the Issuer, the Lead Manager or the Guarantor, as applicable. It is furthermore specified that the Product is not aimed at clients with specific needs regarding sustainability preferences pursuant to Art. 2 No. 7 of the MiFID II Delegated Regulation (EU) 2017/565.
